Data & Reports

Version 9

Select from the right menu to learn more about each feature.

Data and Reports

The Research Platform provides organizations with custom-built data collection tools and real-time reporting and analysis. Return on investment is improved with data accuracy providing reliable and valid results.

Data & Data Access

Data, captured by an online tool, gathers qualitative (narrative) and/or quantitative (# & %) data in real time. Data may be accessed by downloading the CSV and/or designed reports. Zeros, dashes, a N/A or other message indicates that there is no data entered for this particular report or filter chosen. Re-adjust your filters and update report.

Evaluation

Reflection, analysis and evaluation are key to using data in a meaningful way to support organizational health and strategic planning. 'Dig into the data' to review, reflect and respond.

Reports

Reports are custom designed and align with the collection tool. Context and permission settings tailor reports for specific team members. Multiple and complex report variations provide teams with key timely information.

Reminder: User Agreement

Prior to accessing data in the Research Platform, organizations identify a primary contact who will receive an email with a Terms of Use Agreement. Once reviewed and submitted, user accounts and passwords grant access to reported information.

Data collection tools/surveys and reports are customized for each organization
